

The 4th Congress of

INSPIRED

**International Society of Pediatric
Respiratory Diseases**

The Only Global Congress Focused on Pediatric Respiratory Diseases.

25-28 June 2026 | Bologna, Italy

www.inspired-ped.com

INSPIRED, My Place to Belong

PRELIMINARY PROGRAMME

THURSDAY 25th JUNE 2026

PRE-CONGRESS COURSES

(Separate registration and payment are required)

Imaging of the Pediatric Chest

Setting up and Extending a Pediatric Sleep-Disordered Breathing Program in 2026

POCUS for the Pediatric Pulmonologist

Pediatric Lung Function: A Case-Based Approach from Clinical Question to Clinical Significance

Iberoamerican Meeting (Course in Spanish)

The Academic Toolkit: How to Write and Present

***Free of charge, pre-registration required**

Annual Meeting of the Post-Infectious Bronchiolitis Obliterans (PIBO) Consortium: Advances in Understanding and Collaboration

***Free of charge, pre-registration required**

Imaging of the Pediatric Chest	
Chair: Robert Paul Guillerman (USA)	
08:30 – 08:40	Welcome and Course Introduction - Robert Paul Guillerman (USA)
08:40 – 09:10	Pediatric Chest X-Ray Interpretation: The Basics - Robert Paul Guillerman (USA)
09:10 – 09:40	How to See What You Want to See with Chest CT – Savvas Andronikou (USA)
09:40 – 10:10	Chest CT Interpretation: When What You Know Isn't Always So – Andrew Schapiro (USA)
10:10 – 10:30	Coffee Break/Discussion
10:30 – 11:00	Fetal and Neonatal Chest Imaging – Christopher Cassady (New Zealand)
11:00 – 11:30	Imaging of Congenital Lung Malformations – Pierluigi Ciet (the Netherlands)
11:30 – 12:00	Airway Imaging – David Biko (USA)
12:00 – 13:00	Lunch Break
13:00 – 13:45	Little Lungs, Big Insights: Radiologist-Pulmonologist Collaboration to Transform Pediatric Health – Savvas Andronikou (USA)
13:45 – 14:15	Going Nuclear: Thoracic Scintigraphy, PET-CT and PET-MRI – Helen Nadel (USA)
14:15 – 14:45	Functional MRI with Hyperpolarized Xe and Proton Techniques – Jason Woods (USA)
14:45 – 15:15	Real Applications of Artificial Intelligence – Bruno Hochegger (USA)
15:15 – 15:45	Advances in Thoracic Interventional Radiology – Seth Vatsky (USA)

Setting up and Extending a Pediatric Sleep-Disordered Breathing Program in 2026	
Cochairs: Gustavo Nino (USA), Martino Pavone (Italy), Jean-Paul Praud (Canada), Aroonwan Preutthipan (Thailand), Joel Reiter (Israel)	
Morning Session	
08:15 – 08:45	The Scope and Mechanisms of Pediatric Sleep-Disordered Breathing - Jean-Paul Praud (Canada)
08:45 – 09:15	In-Lab Pediatric Polysomnography - Reshma Amin (Canada)
09:15 – 09:45	Other Diagnostic Tools to Complement or Replace Polysomnography – Martino Pavone (Italy)
09:45 – 10:30	New Home Sleep Study Devices and Artificial Intelligence: Ready for Clinical Use or Still on the Horizon? – Gustavo Nino (USA)
10:30 – 11:00	Coffee Break
11:00 – 11:30	Treatment Options Beyond Adenotonsillectomy – Joel Reiter (USA)
11:30 – 12:15	Panel Discussion (All Speakers) Moderator: Aroonwan Preutthipan (Thailand) “Questions and Challenges in Setting up Pediatric Sleep-Disordered Breathing Program”
12:15 – 13:00	Lunch Break and Visit of the Device Display
Afternoon Session	
13:00 – 14:00	Interactive Clinical Cases – Gustavo Nino (USA) & Sonia Khirani (France)
14:00 – 14:45	Meet the Devices - Martino Pavone (Italy)
14:45 – 15:15	Beyond Obstructive Sleep-Disordered Breathing – Sleep Disorders Pediatric Pulmonologists Should Recognize – Joel Reiter (Israel)
15:15 – 15:30	Wrap-Up & Take-Home Messages Building and Strengthening Pediatric Sleep-Disordered Breathing Programs: Key Steps Forward

POCUS for the Pediatric Pulmonologist	
Co-Chairs: Sigmund Kharasch (USA) & Niccolo Parri (Italy)	
08:30 – 09:00	Welcome and Introductions – Sigmund Kharasch (USA) & Niccolo Parri (Italy)
09:00 – 09:45	Lung Ultrasound Lecture – Niccolo Parri (Italy)
09:45 – 10:30	Hands on Lung Ultrasound Training – all speakers
10:30 – 11:15	Diaphragmatic Ultrasound Lecture - Sigmund Kharasch (USA)
11:15 – 12:00	Hands on Diaphragm Ultrasound Training – all speakers
12:00 – 13:00	Lunch Break
13:00 – 13:45	Mastering Pediatric Lung Ultrasound: Clinical Cases and Practical Pearls – Agnieszka Strzelak (Poland)
13:45 – 14:30	Lung Ultrasound in Chronic Pediatric Disease – Ioana Ciuca (Romania)
14:30 – 15:00	Wrap up and Discussion

Pediatric Lung Function: A Case-Based Approach from Clinical Question to Clinical Significance	
Chair: Robert S. Tepper (USA)	
<p>Course Rationale & Statement of Need</p> <p>Pediatric pulmonary function testing provides a sophisticated array of diagnostic tools for children, from preschool age through adolescence. However, in clinical practice, the emphasis should not be on the novelty of a test but on its ability to answer a specific clinical question and guide patient management. Too often, lung function tests are ordered as a standard battery, leading to data overload without clear clinical relevance. This approach can result in unnecessary testing, increased costs, and potential misinterpretation of results.</p> <p>This course bridges that gap by reversing the traditional paradigm. Rather than starting with a menu of available tests, we will begin with the patient. Using a case-based format—focused on preschoolers, school-aged children, and adolescents—we will demonstrate how to refine a precise clinical question for both common and complex respiratory diseases. To ensure a strong foundation, we will first briefly review the physiological principles of pulmonary function assessment. This question-driven approach ensures that the selected test is the most appropriate one, delivering clinically meaningful insights that directly influence diagnosis, monitoring, and treatment decisions. The focus remains on real-world application and the practical significance of the results.</p> <p>Learning Objectives</p> <p>Upon completion of this course, participants will be able to:</p> <ul style="list-style-type: none"> • Formulate precise clinical questions to guide the selection of pulmonary function tests in preschoolers, children, and adolescents. • Select the most appropriate lung function tests to assess pathophysiology in asthma, cystic fibrosis, BPD, and PCD. • Interpret lung function results within the context of the individual patient's clinical presentation and disease, using the best reference values available. • Integrate lung function data with other clinical information to make informed decisions about diagnosis and management. • Recognize the strengths and limitations of different lung function tests in various pediatric age groups, from preschool to adolescence. 	
08:30 – 08:45	Welcome and Introduction - Robert S. Tepper (USA) The “Question-First” Paradigm – Setting the Stage: Why the clinical question is paramount in pediatric lung function testing
08:45 – 09:15	Session 1: Fundamentals of Pulmonary Function Testing: Key Physiological Concepts Robert S. Tepper (USA)

09:15 – 10:00	<p>Session 2: Asthma - Enrico Lombardi (Italy)</p> <p>Case 1: The wheezing preschooler - is it asthma?</p> <p>Case 2: The teenager with poor symptom perception - how do we monitor control?</p> <p>Clinical Question: Is there evidence of reversible airway obstruction? What is the degree of baseline airway obstruction and hyperinflation?</p> <p>Key Tests to Discuss: Spirometry and Oscillometry (pre/post BD), Plethysmography/ Airway Resistance/ Residual Volume)</p>
10:00 – 10:45	<p>Session 3: CF & PCD – Nicole Beydon (France)</p> <p>Case 3: Quantifying early airway disease in a preschooler with CF.</p> <p>Case 4: Assessing airway clearance efficacy and/or disease progression in a child with PCD.</p> <p>Clinical Question: Is there ventilation inhomogeneity suggesting early small airway disease?</p> <p>Key Tests to Discuss: Nasal NO, Lung Clearance, Index (LCI), Spirometry, choice of reference value</p>
10:45 – 11:00	Coffee Break
11:00 – 11:45	<p>Session 4: The Consequences of Prematurity – Marcus Jones (Brazil)</p> <p>Case 5: A 13-year-old former preterm infant with BPD presents with exercise intolerance. What is the underlying physiology?</p> <p>Clinical Question: Is the limitation due to airway obstruction, reduced lung volumes, or a gas exchange abnormality?</p> <p>Key Tests to Discuss: Spirometry, Plethysmography, bronchodilator response, DLCO</p>
11:45 – 12:15	Panel Discussion & Interactive Q&A
12:15 – 13:15	Practical Experience with Spirometer and Oscillometry Equipment
13:15 – 14:00	Lunch Break
14:00 – 15:30	<p>Hands-on-workshop: Inhaled Therapy in Children In and Out of Hospital – Hettie Janssens (the Netherlands)</p> <p>Aims of the workshop:</p> <ul style="list-style-type: none"> • Get to know fundamentals of aerosol deposition of inhaled therapies in children • Practice hands-on with inhalation devices, selection, and correct use • Know how to achieve safe and effective inhaled therapy at home and in hospital • Get to know the principles and best practices of inhaled therapy during ventilatory support.

Iberoamerican Meeting (Course in Spanish)

Chairs: Malena Cohen – Cymberknoh (Israel), Renato Stein (Brasil), Manuel E. Soto Martínez (Costa Rica)

08:30 – 08:40	Welcome (Bienvenida) – Manuel E. Soto-Martínez (Costa Rica) & Malena Cohen– Cymberknoh (Israel)
08:40 – 08:55	Reinventing RSV Prevention: A New Chapter in Pediatric Pulmonology <i>(Reinventando la Prevención del RSV: Un Nuevo Capítulo en Neumología Pediátrica)</i> Renato Stein (Brasil)
08:55 – 09:10	New Approaches to the Diagnosis and Assessment of Severe Asthma in Children and Adolescents <i>(Nuevos enfoques en el diagnóstico y manejo del asma en niños y adolescentes)</i> Erick Forno (USA)
09:10 – 09:25	Severe Asthma in Children: From Phenotype to Endotype and its Therapeutic Impact <i>(Asma grave en niños: del fenotipo al endotipo y su impacto terapéutico)</i> Álvaro Teijeiro (Argentina)

09:25 – 09:40	Approach to the Child with Recurrent Wheezing (<i>Abordaje del paciente con sibilancias recurrentes</i>) Natalia Rivera (Chile)
09:40 – 09:55	Tuberculosis in Latin America: Changes in Prevalence, Diagnostic Challenges, and New Management Guidelines (<i>Tuberculosis en Latinoamérica: cambios en la prevalencia, desafíos diagnósticos y nuevas guías de manejo</i>) Marcelo Scotta (Brasil)
09:55 – 10:05	Q&A
10:05 – 10:35	Coffee Break
10:35 – 10:50	Extrapulmonary Manifestations in the Era of CFTR Modulators (<i>Manifestaciones extrapulmonares en la era de los moduladores del CFTR</i>) Malena Cohen-Cymerknoh (Israel)
10:50 – 11:05	Current Concepts on Primary Ciliary Dyskinesia and the Spectrum of Ciliopathies (<i>Conceptos actuales sobre la disquinesia ciliar primaria y el espectro de ciliopatías</i>) Carlos Milla (USA)
11:05 – 11:20	Diagnostic and Therapeutic Approach to Pediatric Interstitial Lung Diseases (<i>Abordaje diagnóstico y terapéutico de las enfermedades intersticiales pediátricas</i>) Antonio Moreno-Galdó (Spain)
11:20 – 11:35	New Strategies in Noninvasive Ventilation and Respiratory Support in Pediatrics (<i>Nuevas estrategias de ventilación no invasiva y soporte respiratorio en pediatría</i>) TBA
11:35 – 11:45	Q&A
11:45 – 12:00	Functional Respiratory Disorders, Habitual Cough and Beyond (<i>Trastornos Funcionales Respiratorios, Tos Habitual and más allá</i>) Dario Prais (Israel)
12:00 – 12:15	Respiratory Care in the Extremely Preterm Infant: Preventing Chronic Lung Disease (<i>Cuidados respiratorios en el prematuro extremo: prevención del daño pulmonar crónico</i>) Ranniery Acuña (Colombia)
12:15 – 12:30	Management of Acute Asthma (Asthmatic Exacerbation) in the ED (Manejo del Asma Aguda en el Servicio de Emergencias) Jose Antonio Castro Rodríguez (Chile)
12:30 – 12:40	Q&A
12:40 – 12:45	Closure

The Academic Toolkit: How to Write and Present

Course Leads: Andrew Bush (UK) & Eitan Kerem (Israel)

Faculty: Thomas Ferkol (USA), Susanna McColley (USA), Peter Le Souef (Australia), Felix Ratjen (Canada), Quique Bassat (Spain), Heather Zar (South Africa), Shaakira Chaya (South Africa), Guy Hazan (Israel)

08:30 – 15:30 **Theme:** *Essential Academic Skills for the Next Generation*
Format: Short focused lectures + interactive exercises

Course Objectives

By the end of the course, participants will:

Acquire core academic skills essential for launching an independent career in research and education.

Learn how to prepare key academic materials, including a professional CV, abstracts, posters, and presentations.

Understand the structure and strategy behind writing a scientific paper.

Develop effective communication skills for presenting research at congresses and journal clubs.

08:30 – 08:45 **Welcome and Introduction – Eitan Kerem (Israel), Guy Hazan (Israel)**

- Course goals, structure, and introductions

08:45 – 09:05	From Paragonimiasis to a PhD: My Academic Journey - Iso Oloyede (Nigeria) <ul style="list-style-type: none"> • One woman’s story of her academic journey to show what is possible
09:05 – 09:35	Building Your Academic Profile: How to Write a CV - Andrew Bush (UK) <ul style="list-style-type: none"> • Key elements, tailoring for academia, grants, and awards • Exercise: Quick peer review of CV summaries
09:35 – 10:05	How to Design and Present a Poster for a Congress - Shaakira Chaya (South Africa) <ul style="list-style-type: none"> • Writing the abstract • Layout, visuals, and communicating results at a glance • Exercise: Review of example posters
10:05 – 10:30	How to Present at a Journal club, including critical appraisal of papers - Susanna McColley (USA) <ul style="list-style-type: none"> • Key elements, how to review a manuscript • Exercise: Journal club, participants to present papers
10:30 – 11:00	Coffee Break
11:00 – 11:30	How to Deliver an Oral Presentation at a Congress - Felix Ratjen (Canada) <ul style="list-style-type: none"> • Tips on structure, slides, timing, and confidence • Exercise: Short volunteer presentations with feedback
11:30 – 12:00	How to Write a Scientific Paper - Peter Le Souef (Australia) <ul style="list-style-type: none"> • From data to story: structure, clarity, and responding to reviewers
12:00 – 13:00	Hands-On Skills Workshop: Practice & Feedback Session Moderator: Quique Bassat (Spain)
13:00 – 13:30	Lunch Break
13:30 – 14:30	Integrating Skills for Career Growth <i>Panel:</i> All speakers <ul style="list-style-type: none"> • Q&A and discussion: applying these skills in academic life
14:30 – 15:15	Choosing a Mentor and Making It Work - Thomas Ferkol (USA) <ul style="list-style-type: none"> • Identifying mentors, setting expectations, getting the most out of mentorship Presentation of the NEXTGEN one-on-one mentorship program
15:15 – 15:30	Wrap-Up and Next Steps <ul style="list-style-type: none"> • Feedback, mentorship pairing, and closing remarks

Annual Meeting of the Post-Infectious Bronchiolitis Obliterans (PIBO) Consortium: Advances in Understanding and Collaboration

Course Lead: Alejandro Teper (Argentina)

Background:

The Post-Infectious Bronchiolitis Obliterans (PIBO) Consortium is conducting an ongoing international collaborative study to better understand why most children fully recover after an early adenovirus infection, while a minority develop severe, chronic respiratory impairment with lifelong symptoms. The core objective is to elucidate the mechanisms behind this clinical divergence, identifying risk factors, disease pathways, and opportunities for improved diagnosis and management.

Workshop Objectives:

- Present the latest findings on PIBO, including disease mechanisms, study design, patient recruitment, and phenotype definitions.
- Discuss data interpretation and ongoing challenges in multicenter studies.

	<ul style="list-style-type: none"> Foster collaboration and exchange among young researchers and clinicians to accelerate future PIBO research and initiatives.
08:30 – 09:00	Registration
09:00 – 09:20	Opening Remarks – Eitan Kerem (Israel)
09:20 – 09:40	Overview of Adenovirus Infections and Pathophysiology of PIBO – TBA <ul style="list-style-type: none"> Adenovirus structure, types, Mechanisms of airway injury and immune response. Fibrosis and obliteration; long-term sequelae. Genetic basis.
09:40 – 10:00	Diagnostic Criteria of PIBO – Alejandro Teper (Argentina) <ul style="list-style-type: none"> Current diagnostic tools, challenges in early detection including risk factors. Pulmonary function in preschool and school-aged children.
10:00 - 10:20	Sputum Transcriptome in PIBO – Ralf Schubert (Germany) <ul style="list-style-type: none"> Transcriptomic analysis of induced sputum aims to identify specific gene expression signatures and inflammatory mediators, such as IL-8 and TNF-α, which may serve as non-invasive biomarkers for monitoring small airway remodeling.
10:20 – 10:40	Coffee Break
10:40 – 11:00	PIBO CT scan Score – TBA <ul style="list-style-type: none"> The development of a PIBO-specific CT scoring system is essential to standardize the quantification of mosaic attenuation, bronchiectasis, and air trapping, reducing inter-observer variability in radiological interpretation and track structural lung damage over time, facilitating more precise monitoring of patient response to therapeutic interventions.
11:00 – 11:20	PIBO Research Protocol - Felix Ratjen (Canada) <ul style="list-style-type: none"> Presentation and discussion of the research protocol
11:20 – 11:40	Preliminary Analysis of the Included PIBO Patients from Israel and Argentina - Elad Ben Meir (Israel) <ul style="list-style-type: none"> Preliminary results will be reported for a substantial cohort of patients with PIBO from Argentina and Israel enrolled in the study.
11:40 – 12:00	Preliminary Results of the Genetic Findings - Lisa Strug (Canada) <ul style="list-style-type: none"> Preliminary findings suggest that PIBO may have a cryptogenic basis rather than being purely idiopathic, with specific genetic variations in molecular structural or functional lung genes potentially increasing susceptibility to severe airway remodeling after an infection.
12:00 – 13:00	Lunch Break
13:00 – 13:15	PIBO in France - TBA
13:15 – 13:30	PIBO in Turkey - Tuğba Şismanlar Eyuboglu (Turkey)
13:30 – 13:45	PIBO in USA - TBA
13:45 – 14:00	PIBO in India - TBA
14:00 – 14:15	PIBO in Brazil - TBA
14:15 – 14:30	Large group summary discussion
14:30 – 15:00	Panel Discussion: Research Gaps and Future Directions – All speakers

16:00 - 17:30	Meeting of the National Representatives Forum
---------------	--

OPENING CEREMONY 18:00 – 21:00	
18:00 - 18:30	Welcoming Addresses
Opening Ceremony Symposium:	
18:30 – 18:50	Global Lung Health – The Decade Ahead - Heather Zar (South Africa)
18:50 – 19:10	Climate Change and Air Pollution: A Threat to Respiratory Health in Children - Terry Noah (USA)
19:10 – 19:30	Building Trust with Vaccine-Hesitant Parents – Susanna Esposito (Italy)
19:30 – 21:00	Welcome Cocktail Reception

FRIDAY 26th JUNE 2026

8:30 – 10:00 PLENARY SESSION	
08:30 – 09:00	The Challenges in Evidence Based Treatment for Preschool Wheeze - Gary Wong (Hong Kong, China)
09:00 – 09:30	Empowering Clinicians With AI-Guided Lung Ultrasound: Replacing or Supplementing the Stethoscope? - Giovani Volpicelli (Italy)
09:30 – 09:45	Young Investigator Award Presentation
09:45 – 10:00	Young Investigator Award Presentation
10:00 - 10:30	Coffee Break and Exhibition Visit

SYMPOSIUM A 10:30 – 12:00	SYMPOSIUM B 10:30 – 12:00	SYMPOSIUM C 10:30 – 12:00
<p>Year in Review: Major Advances in Pediatric Respiratory Medicine</p> <p>Asthma – Year in Review</p> <p>Fernando de Benedictis (Italy) Focus: Major advances and evolving paradigms.</p> <p>Cystic Fibrosis – Year in Review</p>	<p>Childhood Respiratory Health in a Changing Environment: Evidence and Action</p> <p>Impact of Outdoor & Indoor Air Pollution on Pediatric Respiratory Health</p> <p>Manuel E. Soto-Martínez (Costa Rica) Focus: Epidemiology, asthma, lung function, neurocognitive impact.</p>	<p>Complex Pediatric Lung Diseases</p> <p>A Silent Burden: Recognizing Pediatric Interstitial Lung Disease (ILD) in LMICs</p> <p>Luiz Vicente Ribeiro da Silva Filho (Brazil) Focus: Diagnostic barriers, registries, emerging therapeutic strategies.</p>

<p>Phil Robinson (Australia) Focus: Therapeutics, modulators, registry breakthroughs.</p> <p>Sleep Medicine – Year in Review</p> <p>Sonia Khirani (France) Focus: Innovations in diagnostics, SDB management.</p> <p>Pneumonia – Year in Review</p> <p>Eitan Kerem (Israel) Focus: Diagnostics, clinical trials, global epidemiology.</p>	<p>Environmental Effects of Gas Flaring</p> <p>Iso Oloyede (Nigeria) Focus: Regional evidence, mechanistic insights, airway inflammation, public health actions.</p> <p>Early-Life Environmental Exposures and Chronic Lung Disease Risk</p> <p>Andrew Bush (UK) Focus: Perinatal exposures and long-term programming.</p> <p>Vaping, Tobacco, and Nicotine Dependence in Youth: Understanding the Hidden Epidemic and Implementing Effective Prevention Strategies</p> <p>Stefania La Grutta (Italy)</p>	<p>Persistent Tachypnea of Infancy / Neuroendocrine Cell Hyperplasia</p> <p>Honorata Marczak (Poland) Focus: Diagnosis, natural history, and management.</p> <p>Pulmonary Arteriovenous Malformations (AVMs)</p> <p>Meir Mei-Zahav (Israel) Focus: Diagnosis, intervention, follow-up.</p> <p>Persistent Cough: When to Worry, When to Investigate</p> <p>Julie Marchant (Australia) Focus: Current evidence on chronic cough in children, reviewing the magnitude of the problem, assessment and treatment.</p>
---	---	---

12:15 - 13:15	Lunch Break – Sponsored Symposia (Early registration is required)
13:15 - 14:15	Thematic E-poster Session - POSTER AREA

14:15 – 15:45	PLENARY SESSION
14:15 – 14:45	The Role of Early Viral Infections in the Development of Childhood Asthma: Insights from Rhinovirus and RSV Research – Wojciech Feleszco (Poland)
14:45 – 15:15	Azithromycin for Wheeze Exacerbations in the Emergency Department? - Fernando Martínez (USA)
15:15 – 15:30	Young Investigator Award Presentation
15:30 – 15:45	Young Investigator Award Presentation
15:45 - 16:00	Coffee Break and Exhibition Visit

SYMPOSIUM A 16:00 – 17:30	SYMPOSIUM B 16:00 – 17:30	SYMPOSIUM C 16:00 – 17:30
<p style="text-align: center;">Gates Foundation Symposium: New Advances in Pneumonia Prevention</p> <p>Moderators: Gail Rodgers (USA) & Heather Zar (South Africa)</p> <p>Global Burden, Aetiology, and Severity of Childhood Pneumonia in 2026</p> <p>Rebecca Nantanda (Uganda) Focus: Implications for treatment and global burden trends.</p> <p>Severe Pneumonia: Defining Hypoxemia & Optimal Interventions</p> <p>Eric McCollum (USA) Focus: Thresholds, pulse oximetry, oxygen systems.</p> <p>Pneumococcal Conjugate Vaccine – Expanded Valency, Reduced Doses – What Strategy for Child Health?</p> <p>David Goldblatt (UK) Focus: TBD</p> <p>Access and Affordability of New Vaccines</p> <p>Ignacio Esteban (Switzerland) Focus: Financing, LMIC rollout, partnerships.</p>	<p style="text-align: center;">Suppurative Lung Diseases</p> <p>Guidelines for Diagnosis of Primary Ciliary Dyskinesia – ATS/ERS Recommendations</p> <p>Thomas Ferkol (USA) Focus: Updated diagnostic criteria and implementation.</p> <p>New Insights into the Genetic Basis of Bronchiectasis</p> <p>Heymut Omran (Germany) Focus: Genetic discoveries and mechanisms of disease.</p> <p>Lung Involvement in Primary and Acquired Immunodeficiency States</p> <p>Indu Khosla (India) Focus: Diagnosis, pathogen susceptibility, and long-term management.</p> <p>Post-Infectious Bronchiolitis Obliterans – Latest Advances</p> <p>Alejandro Teper (Argentina) Focus: Diagnostics, imaging, and therapeutic pathways.</p>	<p style="text-align: center;">Complex Lung Disorders: A Global Perspective</p> <p>Congenital Pulmonary Malformations in the Era of Fetal Imaging: Challenges and Opportunities</p> <p>Michele Ghezzi (Italy) Focus: Practical approach to evaluating congenital lung malformations—from prenatal detection to postnatal management—highlighting risk stratification, indications for surgery, and follow-up strategies.</p> <p>Practical Approach to Thoracic Lymphatic Malformations</p> <p>Bruce Rubin (USA) Focus: Clinical approach, differential, assessment and management of thoracic lymphatic malformations in children.</p> <p>Aerodigestive & Lung Interface in Pediatrics</p> <p>Mikhail Kazachkov (USA) Focus: Collaborative models and advance diagnostics.</p> <p>Home Mechanical Ventilation: Noninvasive vs. Invasive Approaches</p> <p>Anna Nathan (Malaysia) Focus: Initiation criteria, technology evolution, caregiver training, safety monitoring.</p>

SATURDAY 27th JUNE 2026

8:30 – 10:00	PLENARY SESSION
08:30 – 09:00	Migration and the Pediatric Lung: Respiratory Health in Child Refugees - Peter Le Souef (Australia)
09:00 – 09:30	Obesity and the Pediatric Lung: Update in the Role of New Metabolic Treatments - Erick Forno (USA)
09:30 – 09:45	Young Investigator Award Presentation
09:45 – 10:00	Young Investigator Award Presentation
10:00 - 10:30	Coffee Break and Exhibition Visit

SYMPOSIUM A 10:30 – 12:00	SYMPOSIUM B 10:30 – 12:00	SYMPOSIUM C 10:30 – 12:00	SYMPOSIUM D 10:30 – 12:00
<p>Cystic Fibrosis in the 21st Century: From Early Diagnosis to Healthy Aging</p> <p>Challenges in Diagnosing CF in Resource-Limited Settings</p> <p>Sushil Kabra (India) Focus: Practical strategies for diagnosis where resources are limited.</p> <p>The Globalization of CF Care</p> <p>Carlos Milla (USA) Focus: Global initiatives, access to modulators, registry development.</p> <p>The Microbiome and Inflammation in CF: From Pathogens to Precision Therapy</p>	<p>Health Disparities in Pediatric Sleep-Disordered Breathing</p> <p>Health Disparities Between HICs and LMICs: Access to Sleep-Disordered Breathing Diagnostic Tools & Treatment</p> <p>Vivian Leske (Argentina) Focus: Global inequalities in access to polysomnography, home sleep testing, sleep surgery, CPAP, and home NIV for children in LMICs.</p> <p>Improving Care for Sleep-Disordered Breathing in Low-Resource Settings</p> <p>Marco Zampoli (South Africa) Focus: Practical, scalable solutions and innovative service models to enhance care for pediatric</p>	<p>Lifelong Implications of Early Lung Injury</p> <p>Long-Term Effects of Prematurity</p> <p>Eugenio Baraldi (Italy) Focus: Lung function trajectories and early-life determinants of chronic lung disease.</p> <p>Bronchopulmonary Dysplasia: Evolving Definitions and Management Strategies</p> <p>Amir Kugelman (Israel) Focus: Novel phenotyping, interventions, long-term follow-up strategies.</p> <p>Molecular Pathways in Chronic Lung Disease</p> <p>Daniele De Luca (Italy) Focus: Surfactant synthesis regulation, vascular development,</p>	<p>TBC</p>

<p>Federico Cresta (Italy) Focus: Translational insights from microbiome studies to therapeutic innovation.</p> <p>Aging with CF: New Horizons in Care and Quality of Life</p> <p>Malena Cohen-Cyberknoh (Israel) Focus: Multisystem care, mental health, fertility, long-term outcomes.</p>	<p>SDB in underserved and resource-limited settings.</p> <p>AI-Enabled Global Pathways for Pediatric Sleep-Disordered Breathing</p> <p>Gustavo Nino (USA) Focus: Using AI, smartphone recordings, and digital tools to create simplified global screening and diagnostic pathways for pediatric SDB.</p> <p>Technology-Dependent Child: Tech-Driven Advances in Pediatric Respiratory Care</p> <p>Reshma Amin (Canada) Focus: Telemedicine, remote monitoring, and digital chronic-care innovations to reduce disparities and improve care for technology-dependent children.</p>	<p>epithelial–endothelial crosstalk.</p> <p>Neonatal Pulmonary Hypertension – Strategy for management and future outcome</p> <p>David Cornfield (USA) Focus: Evaluation, treatment after discharge, target saturation, monitoring and medication.</p>

12:15 - 13:15	Lunch Break – Sponsored Symposia (Early registration is required)
13:15 - 14:15	Thematic E-poster Session - POSTER AREA

14:15 – 15:45	PLENARY SESSION
14:15 – 14:45	Childhood Lung Function Trajectories: Implementation at Clinical and Population Level - Sejal Saglani (UK)
14:45 – 15:15	Precision Medicine in Childhood Asthma: Where Are We in 2026 – Leonard Bacharier (USA)
15:15 – 15:30	Young Investigator Award Presentation
15:30 – 15:45	Young Investigator Award Presentation
15:45 - 16:00	Coffee Break and Exhibition Visit

SYMPOSIUM A 16:00 – 17:30	SYMPOSIUM B 16:00 – 17:30	SYMPOSIUM C 16:00 – 17:30	SYMPOSIUM D 16:00 – 17:30
Clinical cases	Oral Presentation	Oral Presentation	Oral Presentation

SUNDAY 28th JUNE 2026

SYMPOSIUM A 8:30 – 10:00	SYMPOSIUM B 8:30 – 10:00	SYMPOSIUM C 8:30 – 10:00
<p style="text-align: center;">Editor’s Choice: Landmark Publications & Translational Insights</p> <p style="color: #e67e22;">Editor’s Picks – Key Articles Shaping Pediatric Pulmonology (2025–2026)</p> <ul style="list-style-type: none"> • New England Journal of Medicine - Gary Wong (Hong Kong, China) • AJRCCM - Andrew Bush (UK) • Pediatric Pulmonology - Susanna McColley (USA) • Lancet Respiratory Medicine - Felix Ratjen (Canada) <p>Focus: High-impact publications, translational implications.</p>	<p style="text-align: center;">Novel Technology for Childhood Lung Diseases</p> <p>Chair: Rina Triasih (Indonesia)</p> <p style="color: #e67e22;">Telemedicine in Pediatric Respiratory Diseases</p> <p>TBA Focus: Models of care and digital follow-up.</p> <p style="color: #e67e22;">Interventional Flexible Bronchoscopy – The Cutting Edge</p> <p>Mohammad Ashkan Moslehi (Kuwait) Focus: Advanced therapeutic and diagnostic bronchoscopic techniques.</p> <p style="color: #e67e22;">Innovative and Affordable Pediatric Respiratory Devices for LMICs</p> <p>Aroonwan Preutthipan (Thailand) Focus: Low-cost technologies and implementation.</p>	<p style="text-align: center;">Tuberculosis in Children: Unmasking the Disease, Managing the Damage</p> <p style="color: #e67e22;">TB and Pneumonia – A Colliding Epidemic</p> <p>Rebecca Nantanda (Uganda) Focus: Overlapping clinical presentations and burdens.</p> <p style="color: #e67e22;">Pediatric Tuberculosis: What’s New in Diagnosis and Management?</p> <p>Jagdish Prasad Goyal (India) Focus: WHO guidelines, diagnostic tools, algorithms.</p> <p style="color: #e67e22;">Epidemiology of Tuberculosis in Low- Risk Populations</p> <p>Marcelo Scotta (Brazil) Focus: The shifting epidemiology of TB in populations traditionally considered low-risk, highlighting emerging trends, drivers of transmission, and implications for public health strategies</p> <p style="color: #e67e22;">Long-Term Impact of Lung Damage After Pulmonary TB</p>

	<p>Beyond Traditional Labels: Data-Driven Oxygen Requirement Clusters in Preterm Chronic Lung Disease</p> <p>Mauricio Caballero (Argentina) Focus: Exploring novel phenotypes of chronic lung disease in preterm infants through cluster analysis of oxygen requirements in two independent cohorts.</p>	<p>Shaakira Chaya (South Africa) Focus: Post-TB lung disease and long-term care.</p>

10:00 - 10:30	Coffee Break and Exhibition Visit
---------------	-----------------------------------

SYMPOSIUM A 10:30 – 12:00	SYMPOSIUM B 10:30 – 12:00	SYMPOSIUM C 10:30 – 12:00
<p>Asthma: From Guidelines to Precision Care</p> <p>Early-life Predictors of Asthma Development in Children</p> <p>Christian Rosas-Salazar (USA)</p> <p>From Guidelines to Ground Reality – Severe Asthma Across Borders</p> <p>Sejal Saglani (UK) Focus: Bridging global guidelines with real-world constraints (HIC vs LMIC).</p> <p>Strengthening Asthma Control: Ensuring Optimal ICS/LABA Use, Adherence and Risk Factors Avoidance</p> <p>Yasemin Gökdemir (Turkey)</p> <p>Unlocking the Translational Pipeline: Biomarkers and Therapies in Pediatric Asthma</p>	<p>Lifelong Lung Health: Early Detection, Functional Assessment, and Advanced Therapies</p> <p>Preschool Lung Function: Why Early Detection Matters</p> <p>Robert Tepper (USA) Focus: FeNO, oscillometry, early spirometry.</p> <p>Cardiopulmonary Exercise Testing in Chronic Lung Disease and Chest Wall Deformities</p> <p>Ronen Bar-Yoseph (Israel) Focus: Practical approach, interpretation, exercise prescription.</p> <p>The Lung in Congenital Heart Diseases</p> <p>David Cornfield (USA) Focus: Pulmonary vascular disease and outcomes post-surgery.</p>	<p>The Changing Landscape of Pneumonia</p> <p>Changing Patterns of Pediatric Viral Pneumonia in Mainland China: Pre-COVID vs Post-COVID Era</p> <p>Kunling Shen (China) Focus: Highlight the change in predominant pathogens; examine how the presentation, severity and complications changed.</p> <p>AI-Assisted Diagnosis in Pneumonia: CXR, Lung Ultrasound and More</p> <p>Bruno Hochegger (USA/Brazil) Focus: Integration of imaging modalities and AI tools.</p> <p>Biomarkers for Diagnosing Pneumonia and Guiding Antibiotic Use</p> <p>Quique Bassat (Spain) Focus: Host-response biomarkers and treatment stewardship.</p> <p>RSV Prophylaxis in Countries without a Clear Seasonal Pattern</p>

<p>Leonard Bacharier (USA) Focus: From endotypes to biologics; accelerating translation.</p>	<p>Pediatric Lung Transplantation: When and How to Refer, and What Comes After</p> <p>Melinda Solomon (Canada) Focus: Timing of referral, evaluation pathways, post-transplant surveillance.</p>	<p>Anne Goh (Singapore) Focus: TBC</p>
---	--	---

<p>12:00 - 13:00</p>	<p>Radiology and Bronchoscopy Quiz</p>
<p>13:00 - 13:30</p>	<p>Closure Ceremony and Awards Coffee Break and Exhibition Visit</p>
